

IN THE CLAIMS:

Applicants respectfully request the cancellation, modification and addition of the claims as set forth below. (A version to show the modifications is provided herein.)

- Sub B1
- A1
1. An apparatus for use by a purchaser in performing wireless point-of-sale purchase transactions comprising:
 - a microprocessor;
 - a short range communications device electrically coupled to the microprocessor for automatically receiving sales information from and forwarding authorization information to a point-of-sale wireless vendor device for communicating with a point-of-sale wireless vendor device;
 - a long range communications device electrically coupled to the microprocessor for initiating a request to an authorization processor and receiving a response from the authorization processor for authorization of a purchase; and
 - an input device electrically coupled to the microprocessor.
 2. The apparatus of claim 1, further comprising a display electrically coupled to the microprocessor.
 3. The apparatus of claim 1, further comprising a bio-metric input device electrically coupled to the microprocessor.

- ✓ 4. (cancel)

4 5. A system for use in a wireless purchasing environment, wherein an electronic receipt is generated by a purchaser device at a point-of-sale, the system comprising:

an authorization processor;

a vendor device for short range transmission of information regarding inventory and pricing; and

a purchaser device for requesting information from the vendor device, for transmitting a request for authorization to the authorization processor, and for receiving authorization from the authorization processor.

✓ 6. (cancel)

5 7. The system of claim 5, wherein the purchaser device is a wireless purchaser device.

6 8. The system of claim 5, wherein the purchaser device further comprises a bio-metric input device for user identification.

7 9. In a system that includes a purchaser device and an authorization processor, a method for performing wireless point-of-sale purchase transactions, the method comprising the steps for:
automatically receiving from a wireless vendor device an offer for purchase;
initiating a request at the purchaser device for authorization of a purchase;
transmitting the request to an authorization processor;
receiving a response at the purchaser device from the authorization processor, wherein the response includes a denial if the purchase is not authorized by the authorization

processor, and wherein the response includes an approval if the purchase is authorized by the authorization processor; and transmitting the approval from the purchaser device to the vendor device.

8
10. The method of claim 9, further comprising at least one of the steps for:

- (i) using a bio-metric input device to identify a user;
- (ii) using a password to identify the user.

Cont.
13
9
11. The method of claim 9, wherein the step for transmitting the approval includes the step for using a short range wireless transceiver.

12
12. The method of claim 9, wherein the step for transmitting the request includes the step for using a long range, wireless communications device.

11
13. In a system that includes a purchaser device, an authorization processor, and a vendor device, a method for performing a wireless point-of-sale purchase transaction, the method comprising the steps for:

automatically establishing a wireless communication between the vendor device and the purchaser device;

communicating a vendor identification and a purchase price for one or more items to the purchaser device via the wireless connection;

initiating a request at the purchaser device for authorization from the authorization processor to purchase the items;

receiving a denial at the purchaser device if said purchase is not authorized by the authorization processor; and

receiving an approval at the purchaser device from the authorization processor if the purchase is authorized by the authorization processor, and forwarding the approval from the purchaser device to the vendor device for purchase.

Cont
13
12
14 The method of claim *11* 13, wherein the step for initiating a request and the steps for receiving each utilize a long range communications device.

13
15 The method of claim *12* 14, wherein the long range communications device is a wireless device.

14
16 The method of claim *12* 14, wherein said long range communications device is integral to the purchaser device.

15
17 The method of claim *12* 14, wherein the long range communications device is external to the purchaser device and selectively operated by a user of the purchaser device.

14
18 The method of claim *12* 14, wherein the long range communications device includes a wireless phone.

19 (cancel)

20. (cancel)

Please add the following new claims:

77 ¹¹21. The method of claim ¹¹13, wherein the step for initiating a request comprises the step for combining the vendor identification and the purchase price with information corresponding to a purchaser account to create the request.

13 ¹⁷22. The method of claim ¹⁷21, wherein the step for receiving an approval further comprises the step for initiating a transfer of funds from the purchaser account to a vendor account for payment of the purchase.

19 ¹¹23. The method of claim ¹¹13, wherein the step for automatically establishing a wireless connection occurs when the vendor device enters a communication range with the purchaser device.

70 ¹¹24. The method of claim ¹¹13, further comprising the step for identifying user identity by providing at least one of:

- (i) a password; and
- (ii) a biometric input.
